SSYRA books

Accelerated Reader

I was so proud of all my students for their achievements with AR during the 3rd marking period. Please remember that your child should be getting 80% or higher accuracy on their AR tests. Many students are well on their way to reaching their 4th Quarter goals too!

coming soon!

We will begin 5th Grade math prep. These skills introduce our 4th graders to upcoming 5th grade math and are also a little review of 4th grade.

In Language Arts we will be continuing to review our standards. We will continue to work on writing, focusing on various types of writing including poetry and narratives.

Social Studies

In Social Studies we are currently studying Florida's people, economy, and government. Some big ideas in these units are how Florida grew into a successful business state, Florida's role during WWI and WWII, and the Florida's civil rights movement.

Science

In Science we have been studying physical science concepts. A couple of big ideas in these units are energy, heat, and force and motion. Also, in a few weeks, we will learn about owls and dissect an owl pellet. 4th graders LOVE this activity and learn while doing it!
