

ThinkCentral

Welcome to the ThinkCentral website! We use Harcourt for both our Science and Math curriculum. You will be able to access the books used in class on the website www.thinkcentral.com. I have included instructions below on how you can access your child's book online.

Go to www.thinkcentral.com

Choose Mathematics (Left hand side)

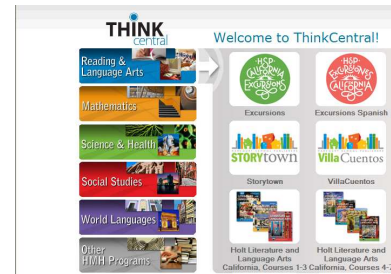

Then click Go Math! Florida

To log in:

Choose: State - Florida

District - The Villages Charter District

School - Villages Charter School Intern School

Username & password- located inside you child's agenda

Once you are logged in, choose My Library on the right hand side.

Choose Go Math! Common Core Student Edition G3

Choose one of the two options that are supported by your home computer.

Click on Table of Contents and find today's lesson.

You can review the lesson we did together in class.

In the upper right hand corner of the tool bar you will see some areas that may offer extra practice on that skill. Not every lesson has these options.

If homework is left at school you can also access today's homework by choosing Go Math! Florida Common Core Standards Practice (SE) G3

You can also get extra help by clicking on Go Math! Animated math models, G3 or Online Florida intervention

Please also take advantage of this website to get any extra support your child may need in math & science. We will be logging on and exploring what is available to us.
